

# Geometry Tools: Mark/Opp End Indicator On/Off

## Known Limitations:

- NA

## Programmed Result of Tool:

These two tools turn on or off the visibility of the nested Mark End and Opposite End as well as Left/Right side indicators of all Double Tees, TGirders, LGirders, and Beams in the view.

## Steps to Perform tool Operation:

*The tool will automatically update the Visibility Graphics of the current view to include the display of the MarkOpp and Left/Right side indicators for all structural framing members that contain these nested families.*

1) User clicks the MarkOpp On icon and turns on visibility for the MarkOpp indicators in the active view.

2) User clicks the MarkOpp Off icon and turns off visibility for the MarkOpp indicators in the active view.
