

# Family Tools: Finish Parameter Removal

## **Programmed Result of Tool:**

These tools remove all finish parameters of a family and applies the default parameter data to standard parameters.

## **Steps to Perform tool Operation:**

*The user clicks the tool and the current family has all finish related parameters removed and default parameter data applied to standard parameters.*

- 1) User clicks the Finish Parameters Removal icon.

## **Known Limitations:**

- This tool works preexisting families and new families alike. However, for parameters to be removed the parameter name must be coded into the software. Therefore, there may be leftover parameters if the preexisting family utilized nonstandard parameters or parameters which are not coded into the software.
