

# Ticket Tools: Find Referring Views

## **Programmed Result of Tool:**

This tool will open a dialog from which the user can select a Legend View or Symbol that exists in the project and then see where each instance of the selected Legend View or Symbol is placed on sheets.

## **Steps to Perform tool Operation:**

*The user selects the tool, then the user selects the Legend Views or Symbols (multiple selections are allowed) that are desired to be seen. The Tool then populates a second tab which contains each selected element as a list. The user can then select an individual sheet from the list and navigate to that specific sheet*

- 1) User clicks the Find Referring Views icon.
- 2) The user then selects the desired Legend Views and/or Symbols in the list to see where these elements have been placed.
- 3) The user then reviews the list of sheets in which the selected Legend View or Symbol has been placed.
- 4) The user can then select the specific sheet and activate it if desired.

## **Known Limitations:**

- This tool works with Legend Views and Symbols only. (Views and Schedules can be found using right-click in the Project Browser)
